Standard Bedding Sizes

Mattresses are available in semistandard sizes for width and length, but the depth varies. Flat sheets, blankets, comforters and bedspread sizes may vary several inches in each direction, depending on the manufacturer. Sizes given below are general and will fit the mattress size indicated.

For the best results when making duvet covers and comforters, measure the actual bed. Determine the desired drop (the amount that hangs over each side and the end of the bed), and add that measurement to the mattress width (at each side) and length. If you're making a duvet cover for a purchased comforter, measure the actual comforter as sizes may vary.
